

Flight Instructor Open Forum

At this Flight Instructor Open Forum, we will be discussing techniques and methods of teaching Stalls and Spins including entry, recognition and recovery. Loss of Control – In flight (LOC-I) is one of the leading causes of fatal General Aviation Aircraft Accidents. Many LOC-I accidents result in stall/spin fatalities. As an instructor, by teaching students to become proficient in how to recognize and recover from stalls and spins you are helping to create a safer pilot. Please click on the link below to register for this event today!

Directions: The meeting will be held in the Conference room.

See the map link in additional Information section below for driving directions.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
